Present Land Use/Zoning/General Plan Designation:

City - School, RPD - 61,700 and 28,500 District - Primary Educational, Athletics and Agricultural and Open Space

Project Description: (please use a separate page if necessary)

The 2015 Facilities Master Plan Update will evaluate changes in land use, new projects and an enrollment increase of 3,745 from 2015-2020. As an urban area, the potential impacts are traffic and traffic-related noise and air quality impacts. The project includes demolition of Hilmer Lodge Stadium and new development on the 32.2-acre site: including the Athletic Complex East (Phase 1) and Physical Education Complex (Phase 2). Together, the two projects are named the Physical Education Project. The existing stadium had 11,940 permanent seats. The new stadium will include a 9-lane 400-meter track, permanent bleachers for 10,912. The net increase at buildout for the FMP Update is less than 500,000 gross square feet.

Note: The State Clearinghouse will assign identification numbers for all new projects. If a SCH number already exists for a project (e.g. Notice of Preparation or previous draft document) please fill in.

Dean C. Lonan, Registrar - Recorder/County Clerk

Reviewing Agencies Checklist

Lead Agencies may recommend State Clearinghouse distribution by marking agencies below with an "X". If you have already sent your document to the agency please denote that with an "S".

The Mt. San Antonio Community College District (District) is the Lead Agency and has completed the Draft Subsequent Project and Program Environmental Impact Report (Draft EIR) for the Mt. San Antonio College 2015 Facilities Master Plan Update and Physical Education Projects. The CEQA documentation consists of two volumes: Volume 1: Draft EIR and Volume 2: Appendices. The Draft EIR evaluates the environmental impacts of buildout of the 2015 Facilities Master Plan Update (FMPU) in a Program EIR and the Physical Education Project (Phase 1, 2) in a Project EIR. The 420-acre campus is located in the City of Walnut, County of Los Angeles, near Grand Avenue and Temple Avenue.

The 2015 FMPU includes facilities for educational programs for a student enrollment of 39,731 fall enrollment headcount in academic year 2020-21 and a 43,139 enrollment in 2025-26. Current enrollment is 35,986. There was approximately 1,556,400 gsf of facilities on campus in August 2015. Buildout of the 2015 FMPU will result in a net increase of approximately 425,900 gsf in 2020 and 752,200 in 2025.

The Draft EIR also evaluates the potential environmental impacts of hosting the 2020 U. S. Track & Field Olympic Trials for 10-days during the Summer Term. The traffic and parking impacts of hosting up to 20,000 guest daily is also evaluated in the EIR.

The prior 2002, 2005, 2008 and 2012 Facility Master Plans were evaluated in the Final Program EIRs (SCH 2002041161) that were certified in December 2002, January 2006, September 2008 and December 2013. This Draft EIR will address only those issues needed to make the prior 2002-2012 documentation adequate for the current projects and the projected student enrollments.

Table 1.3: Summary of Impacts lists the potential impacts of buildout of the projects, the recommended mitigation measures and the level of significance with mitigation. A Statement of Overriding Considerations (SOC) is recommended for project impacts on historic resources and on traffic level of service (i.e. when further improvements are not feasible). The traffic study evaluates 2015 FMPU impacts at eighteen intersections based on trip increases due to the student enrollment increases and for nineteen intersections for the 2020 Olympic Trials.

Document Available for Review:

The NOC and the complete Draft EIR document is posted on the District's website:
<http://www.mtsac.edu/construction/reports-and-publications/environmental-impact-reports.html>

The Draft EIR document may also be reviewed at the following locations:

Walnut Public Library
 Reference Desk
 21155 La Puente Avenue
 Walnut, California 91789

Mt. San Antonio College Library
 Building 6, Library, 2nd floor, Reference Desk
 1100 North Grand Avenue
 Walnut, California 91789

Time for Review:

The Draft EIR is being circulated for a 45 day public review period from June 13 to July 28, 2016. All comments on the Draft EIR must be received by 5:00 pm on Thursday, July 28, 2016.

Since the number of public comments may be extensive, all comments should be forwarded as written correspondence or pdf attachments to e-mails. **Freestanding e-mail comments are discouraged.** Please include the name, and full mailing address, of the respondent in all communication and the date the comments are sent. If an agency is responding, please provide a person, e-mail address and phone number.

Please send your comments to Mikaela Klein, Senior Facilities Planner at the address below:

Summary Form for Electronic Document Submittal

Form F

Lead agencies may include 15 hardcopies of this document when submitting electronic copies of Environmental Impact Reports, Negative Declarations, Mitigated Negative Declarations, or Notices of Preparation to the State Clearinghouse (SCH). The SCH also accepts other summaries, such as EIR Executive Summaries prepared pursuant to CEQA Guidelines Section 15123. Please include one copy of the Notice of Completion Form (NOC) with your submission and attach the summary to each electronic copy of the document.

SCH #: 2002041161

Project Title: Mt. San Antonio College 2015 Facilities Master Plan Update and Physical Education Projects EIR

Lead Agency: Mt. San Antonio Community College District

Contact Name: Mikaela Klein, Senior Facilities Planner

Email: mikaela.klein@mtsac.edu Phone Number: 909-274-5720

Project Location: City of Walnut and County of Los Angeles
City County

Dean C. Logan, Registrar - Recorder/County Clerk

Project Description (Proposed actions, location, and/or consequences).

The 2015 Facilities Master Plan Update (FMPU) provides future facilities for a student enrollment increase of 3,745 students in 2020-21 and an increase of 7,153 students in 2025-26. The 2015-16 fall enrollment headcount is 35,986. The Physical Education Projects (Phase 1, 2) propose the demolition of Hilmer Lodge Stadium (11,940 seats) and new construction of a 19,752 seat facility with permanent, temporary and lawn seating. There will be 10,012 permanent seats in the new stadium. The interior stadium area will increase from 3.53 acres to 4.16 acres. Other changes in the 2015 FMPU include the relocation of the Public Transportation Center to Lot D3, an expanded Wildlife Sanctuary/Open Space area, and a pedestrian bridge across Temple Ave connecting the Physical Education Complex to Lot F.

There are approximately 1,556,400 gsf on campus today. Buildout of the 2015 FMPU will result a net increase of approximately 425,900 gsf in 2020 and 752,200 gsf in 2025. The student enrollment increase results in an additional 4,606 trips (ADT) in 2020 and an additional 8,798 trips (ADT) in 2025. The traffic study evaluates eighteen local intersections for the existing, existing plus project and existing plus project plus cumulative scenarios. The project trips account for 23 and 19 percent of the total ADT peak hour trips of the cumulative trips for the study area for 2020 and 2025. The campus may also host the 2020 U. S. Track & Field Olympic Trials for ten days in the summer of 2020. Up to 20,000 guests may attend daily, with the largest attendance on the final weekend.

Identify the project's significant or potentially significant effects and briefly describe any proposed mitigation measures that would reduce or avoid that effect.

This EIR is a subsequent program and project EIR that evaluates all potential significant impacts of the 2015 FMPU that were not identified in the previous 2002, 2005, 2008 and 2012 EIRs. Table 1.3: Summary of Impacts lists the potential project impacts, the recommended mitigation measures and the level of significance. The entire list of mitigation measures (i.e. the recommended 2016 Mitigation Monitoring Program) is included as Appendix L1 in Volume 2.

Buildout of the 2015 FMPU in 2020 has impacts at six locations, with adverse impacts at two because further improvements are not feasible. In 2025, the locations are nine and four. For the cumulative scenario, the project impacts nine locations and five locations will be adverse because further improvements are not feasible. In 2025 the locations are thirteen and six for the cumulative scenario. There may also be adverse pm peak impacts of hosting the 2020 Olympic Track & Field trials when guests leave an event during the evening commute.

Buildout of the 2015 FMPU may result in adverse cumulative impacts on buildings declared contributors to the Mt. SAC Historic District. The demolition of Hilmer Lodge Stadium is also adverse.

The SEIR includes evaluation of the air quality, greenhouse gas and noise impacts of the project. Since the SEIR is a Project EIR for the Physical Education Projects (PEP), soils/geology, biological resource, lighting and hydrology studies were also completed.

A separate traffic and parking analysis was completed for hosting the Olympic Track & Field event (Section 3.11).

If applicable, describe any of the project's areas of controversy known to the Lead Agency, including issues raised by agencies and the public.

the West Parcel Solar Project and Parking Structure J, Lot A (2,300 Spaces) are two projects approved in 2013 based on the 2012 Final EIR. These projects are controversial and are the subject of pending CEQA and land use litigation in Los Angeles County Superior Court (Case No. B576587 [consolidated]). The District has canceled the Parking Structure J Project as approved in the 2012 Final EIR and is now proposing a new 1,600 space parking structure on Lot A. The District expects a local neighborhood group organized as United Walnut Taxpayers will oppose the new parking project and other projects identified in the 2015 EIR as impacting the residential character of the neighborhood.

Another area of controversy is the authority of the City of Walnut to exercise land use and zoning authority over the projects identified in the 2015 EIR. The District believes it may rely on the land use and zoning exemptions in the Government Code as identified in the 2015 EIR.

Fourteen responses were received during circulation of the Notice of Preparation for the project. Numerous comments were received from the City of Walnut and from United Walnut Taxpayers, which have been addressed in the EIR if they are environmental issues related to the current project, and not related to prior projects or the lawsuit.

No substantial comments were received from South Coast Air Quality Management District, the State Clearinghouse, Los Angeles County Public Works, Los Angeles County Sheriff, Native American Heritage Commission and the Consolidated Sanitation Districts of Los Angeles County.

Provide a list of the responsible or trustee agencies for the project.
